1 Presentazione Presentation

Cos'è uno Skill Park?

Per imparare al meglio a guidare la bicicletta, saper gestire situazioni improvvise, tipi di terreni vari e sconnessi e diverse inclinazioni. È necessario sperimentare in un contesto controllato molteplici situazioni di guida che difficilmente si incontrano in una strada di città o sulla pista ciclabile.

Gli Skill Park nascono proprio con questo obiettivo: migliorare la tecnica di guida bike.

Gli Skill Park vengono utilizzati prevalentemente con scopi didattici, nei parchi gioco e nelle bike schools oppure posizionati all'interno di Trail Center e aree sportive per affinare la tecnica, migliorare le proprie performance e progredire nell'allenamento.

What is the Skill Park?

To learn how to ride a bicycle in the best possible way, to be able to manage sudden situations, various and rough terrain types and different inclinations. It is necessary to experiment in a controlled context many driving situations that are difficult to encounter on a city street or on the cycle path.

The skill parks are born with this goal: to improve the bike driving technique.

The skill parks are mainly used for educational purposes, in playgrounds and bike schools or positioned within Trail Centers and sports areas to refine your technique, improve your performance and progress in training.

MODULI

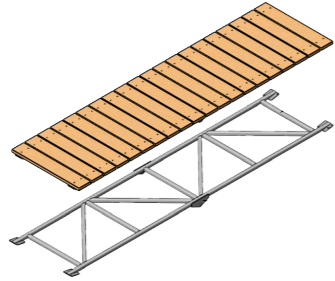

Crea il percorso da mountain bike perfetto per te e adatto al parco a disposizione grazie al design modulare delle nostre piattaforme.

Create the perfect mountain bike trail for you and suitable for the available park thanks to the modular design of our platforms.

2 Composizioni

Composition

Composizioni

Gli ostacoli naturali spesso non sono sufficienti per dare vita a Bike Park e Trail Center veramente validi e divertenti. Per introdurre i partecipanti allo sport della bike in un modo semplice e tecnico, per affinare le capacità di guida prima di affrontare i percorsi in ambiente naturale, lo Skill Course è la scelta perfetta. L'area di pratica rende possibile avvicinarsi agli ostacoli apprendendo nuove tecniche in un contesto di guida sicuro e controllato.

La funzione principale degli Skill Park è dunque di natura tecnica, per questo Dolomeet ha progettato soluzioni progressive su tre livelli: Skill Kids, Skill Fun e Skill Pro.

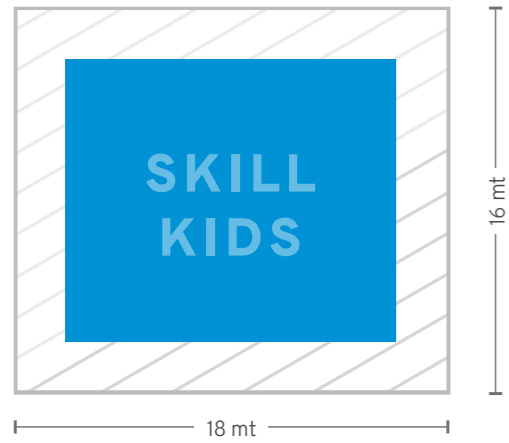

Composition

Natural obstacles are often not enough to create truly valid and fun Bike Parks and Trail Centers. To introduce participants to the sport of biking in a simple and technical way, to hone their driving skills before tackling the routes in a natural environment, the Skill Course is the perfect choice. The practice area makes it possible to approach obstacles by learning new techniques in a safe and controlled driving environment.

The main function of the Skill Parks is therefore of a technical nature, which is why Dolomeet has designed progressive solutions on three levels: Skill Kids, Skill Fun and Skill Pro.

SKILL KIDS

Composizione di base adatta per aiutare i principianti a prendere confidenza con le due ruote lavorando sull'equilibrio, sulla capacità di guida e sulla gestione della frenata.

- AREA**
288 mq
- AREA PERCORSO**
PATH AREA
14X12 mt
- 2 mt**
Distanza di sicurezza conforme agli standard DIN EN 14974.
Safety distance in accordance with DIN EN 14974 standards.

Basic composition suitable for helping beginners to become familiar with the two wheels by working on balance, driving ability and braking management.

SKILL PRO

È la versione più impegnativa. Le strutture si fanno più strette per un percorso avvincente e tecnico. E' pensato per stimolare la precisione di guida e l'equilibrio.

Grazie a Skill Pro i bikers più esperti potranno progredire nella tecnica di guida al meglio le proprie abilità pronti per affrontare i percorsi in ambiente naturale.

It is the most demanding version. The structures become narrower for an exciting and technical path. It is thought out to stimulate driving precision and balance.

Thanks to Skill Pro, the most experienced bikers will be able to progress in the driving technique to better your own skills ready to face the paths in the environment natural.
